Possible battery fix
By Doug Archer

I want to chime in with a possible fix for the battery issues some people are experiencing. First, I'm very happy with the phones and recommend them to anyone looking for a simple cordless phone with not too many bells and whistles. I did, however, have the same battery experience as a couple other people. When I first set the phones up, one of them would immediately drop from 4 to 3 bars of battery life when removed from the charger which was rather annoying. The entire battery would be dead in ~ 1 hour. What fixed it for me was pretty simple: I just let the phone fully discharge a couple of times and then recharged it. Now I get great battery life. Theoretically, this shouldn't happen with newer batteries, but it worked great for me. I don't even know the battery life now because it will last for a couple of days at least before it dies, and I've never left it off the charger for that long. Might not work for everyone, but something to try before dealing with a return or RMA from VTech.

 Works Well

By Richard Wagoner

I wish V-Tech would still put in the capability of having a battery in the base unit so that the phone can be used during power failures as some of their old models did. Other than that, this is a fine cordless telephone.

Sound quality is far superior to the Panasonic that it replaced, both on the receiving and sending ends. It is easy to use, easy to program, has great battery life, and is nice to hold.

My old V-Tech (that we still use for another set of phone lines in the house) is still flying high after at least seven years (I cannot even remember when I bought it), and I expect this one to last a long time too.

This is an excellent cordless phone set that is a definite bargain!

By D. Fowler

After a massive lightning strike that sent me and my next door neighbor scrambling to replace everything from televisions to appliances I had to make a decision about phone selection. After Nigel the cable guy got me fixed up and Mike the phone guy assured me that my phones would work (they didn't) I started checking out cordless phone sets on Amazon. I knew I'd that once I made my selection, the order would be processed quickly and I'd have my phones in good order and I did.

I selected this Vtech 2 handset cordless phone set because it met all my needs. Within ten minutes I had both phones up and running. There was enough charge to make calls immediately and, surprisingly, the date and time functions were already in place. A quick check and everything was in order, including the caller ID. I phoned out and ask someone to call me so I could check this feature. Oh, and one of the best features was that the price was right. Had I gone to the place where I've purchased phones in the past I would have paid double.

WHAT'S IN THE BOX:

- * Two handsets
- * Two telephone line cords
- * Two battery compartment covers
- * Two batteries

- * Two telephone bases
- * Two telephone base power adapters
- * A wall mount bracket
- * A user manual

I had these phones up and running within ten minutes after the postman placed the box on my porch. I only had to place the batteries in the phones, put the battery compartment covers on, plug the phones in and I was good to go. I know these phones do have substance to them because I already dropped one on my ceramic tile floor and it didn't shatter. My telephone jack sticks out and I would have liked to see the wall mount bracket raised more, but essentially it's a non-issue or pettiness on my part.

OVERVIEW:

- * Caller ID/Call Waiting - stores 50 calls
- * Handset speakerphone
- * Backlit keypad and display
- * Expandable up to 5 handsets with only one phone jack
- * DECT 6.0 Digital technology - "Utilizing the latest-available frequency band, this interference-free technology provides superior voice and sound quality and higher protection against eavesdropping than 2.4GHz and 5.8GHz phone system"
- * 50 name and number phonebook directory
- * Call waiting
- * Caller ID (you have to subscribe to this via your phone service)
- * Intercom between handsets
- * Conference between an outside line and up to 2 cordless handsets
- * Last 10 number redial
- * Any Key Answer
- * Volume Control
- * Trilingual prompts allow you to choose between English, Spanish or French.
- * Limited Warranty, one year

Of course only time will tell if these phones will hold up, but so far so good and I've quite pleased. If you ever need to replace the battery, you can purchase the HQR Phone Battery which is quite reasonably priced. If you'd like an extra handset, you may wish to add the VTech CS6409 DECT 6.0 Accessory Handset Cordless Phone to your order. I'm quite happy with this purchase and wouldn't hesitate to recommend them to anyone, especially those who are looking for a reasonable

priced cordless phone. [See all 1569 customer reviews...](#)

View larger. Two Handset Cordless Phone with Caller ID

Made to meet the needs of the budget-conscious consumer, the VTech CS6419-2 cordless phone system comes with two handsets, handset speakerphones and a caller ID/call waiting feature that stores up to 50 calls. DECT 6.0 Digital technology delivers superior sound quality and range, while ensuring wireless networks and other electronic devices don't interfere with conversations.

With the phone's digital security, your calls are digitized and encrypted, making it nearly impossible for someone to eavesdrop. Text messages on the handsets silently alert you to new voice mails (provided you subscribe to voicemail service through your phone company).

Plus, intercom, call-transfer and conference capabilities streamline in-home communication, cutting down on the need to shout to be heard throughout the house. The keypad and LCD screen illuminate, allowing for easier viewing in dim light. The VTech CS6419-2 can expand up to five handsets using only one phone jack, making it ideal for growing families.
